

# CREATION OF IBM CLOUD SERVICES

**Team ID: PNT2022TMID07013**

**Project Name: Smart Waste Management System for Metropolitan Cities**

The screenshot displays the IBM Cloud console interface. At the top, there's a navigation bar with the IBM Cloud logo, a search bar, and links for Catalog, Manage, and the user's account (RAGAVAN M's Account). Below the navigation bar, the main content area shows the 'Internet of Things Platform-cl' resource, which is active. A sidebar on the left contains links for Manage, Plan, and Connections. The main content area features a large graphic of a central node connected to several peripheral nodes, representing an IoT network. To the right of the graphic, there's a section titled 'Let's get started with IBM Watson IoT Platform' with a brief description and two buttons: 'Launch' and 'Docs'. Below this, a section titled 'Ready for the next level?' introduces the 'IBM Watson IoT Platform Journey' with three stages: Lite, Non-Production, and Production. Each stage has a brief description of the service plan.

IBM Watson IoT Platform Journey

Lite

The Lite service plan provides a lightweight development environment to get you started with the powerful capabilities of Watson IoT.

Non-Production

The Non-Production service plan is a full-featured, fully-integrated offering that enables you to explore Watson IoT Platform to your heart's content.

Production

The Production service is a fully managed SaaS offering that enables you to manage and analyze enterprise IoT data.
